THREADLESS

How Threadless Jewelry Works

All of the ends are shipped with straight pins; they must be firstly bent slightly before use.

STEP 1:

Insert the pin about halfway into the shaft (or a third of the way in)

STEP 2:

Bend the pin SLIGHTLY as shown. (more bend=tighter fit)

STEP 3:

Push in the end to close. (The bent pin straightens out inside of the shaft, creating a spring tension force that holds the two pieces together.)

STEP 4:

Pull apart both ends to remove. If the jewelry is tight, add a slightly twisting motion while you pull out the removable end.

ADJUSTING THE FIT: Go back to STEP 2.
